Journal of Computer Assisted Learning (1991) **7**, 261–264

Author index

Anderson, A. (see Howe, C.), 133
Barton, R. & Rogers, L. The computer as an aid to practical science—studying motion with a computer, 104
Bethge, T. (see Niedderer, H.), 84
Brierley, W. (see Kemble, I.), 170
Brna, P. Promoting creative confrontations, 114
Byard, M. (see Twigger, D.), 144
Davis, N. The lack of electronic communications in initial teacher training, 2
Draper, S. (see Twigger, D.), 144
Driver, R. (see Twigger, D.), 144
Dunn, S. & Ridgway, J. Computer use during primary school teaching practice: a survey, 7
Dunn, S. & Ridgway, J. Naked into the World: IT teaching experiences on a final primary school teaching practice—a second survey, 229
Ennis, C.D. & Safrit, M.J. The use of hierarchical problem solving routines in the solution of exercise science problems, 241
Genin, T. Information technology in art and design: visual sensitivity, learning and assessment, 178
Govier, H. IT in Primary Schools—the opportunities of the National Curriculum, 162
Hartley, R. (see Twigger, D.), 144
Healy, I. (see Hoyles, C.), 210
Hennessy, S. (see Twigger, D.), 144
Howe, C., Tolmie, A. & Anderson, A. Information technology and group work in physics, 133
Hoyles, C., Healy, I. & Sutherland, R. Patterns of discussion between pupil pairs in computer and non-computer environments, 210
Johnstone, A.H. Why is science difficult to learn? Things are seldom what they seem, 75
Karrer, U. Impacts of courseware and student characteristics on learning achievement: results of an empirical study, 18
Kemble, I. & Brierley, W. Computers and translation: integrating IT into undergraduate foreign language learning, 170
Light, P. (see Messer, D.), 156
MacDonald, S. Information technology in the National Curriculum: a view from Scotland, 34
Mallen, C. (see Twigger, D.), 144
Martin, R. School children's attitudes towards computers as a function of gender, course subjects and availability of home computers, 187
Mercer, N., Philips, T. & Somekh, B. Research notes: Spoken language and New Technology, 195
Messer, D. & Light, P. Research notes: The role of collaboration and feedback in children's computer-based learning, 156
Millar, R. Why is science so hard to learn?, 66
Mohamed, R. (see Twigger, D.), 144
Niedderer, H., Schecker, H. Bethge, T. The role of computer-aided modelling in learning physics, 84
O'Malley, C. (see Twigger, D.), 144
O'Shea, T. (see Twigger, D.), 144
Philips, T. (see Mercer, N.)
Project INTENT team Research notes: Initial teacher education and new technology (Project INTENT), 255
Ridgway, J. (see Dunn, S.), 7
Ridgway, J. (see Dunn, S.), 229
Rogers, L. (see Barton, R.), 104
Ross, S.M. Interactive videodiscs for science education, 96
Safrit, M.J. (see Ennis, C.D.), 241
Scanlon, E. (see Twigger, D.), 144
Schecker, H. (see Niedderer, H.), 84

Sharples, M. The development of a cognitive model for computer support of collaborative writing, 204
Sharples, M. Computer-based tutoring of visual concepts from novice to experts, 123
Somekh, B. (see Mercer, N.), 195
Sutherland, R. (see Hoyles, C.), 210
Tolmie, A. (see Howe, C.), 133
Twigger, D., Byard, M., Draper, S., Driver, R., Hartley, R., Hennessy, S., Mallen, C., Mohamed, R., O'Malley, C., O'Shea, T. & Scanlon, E. The 'Conceptual Change in Science' project, 144
Yerushalmy, M. Student perceptions of aspects of algebraic function using multiple representation software, 42

Index of previews

Title	Microcomputer	Page no.
Case notes in Biochemistry	IBM PC or compatible running Microsoft 'Windows' 2.01 or above, Apple Macintosh (512k E or above)	58
Hands on Spelling	BBC micro and concept Keyboard	59
Granville	BBC Model B, BBC model BBC+. Also runs on BBC Master 128 (Master series Welcome and Utilities Disc)	205
